## Agenda

- Welcome – Rebecca Edelmayer **(5 min)**

### Global Biomarkers Standardization Consortium

- Certified Reference Material Manufacturers' Pilot Study Publication – Britta Brix **(5 min)**
- Tau Reference Methods & Materials – Henrik Zetterberg **(10 min)**

### Standardization of Alzheimer's Blood Biomarkers

- Review of table/information compiled by the Biofluid Based Biomarker PIA on plasma amyloid- $\beta$  literature/data - Silvia Fossati, Michelle Mielke, Danni Li **(15 min with discussion)**
- Preview of vision for round robin testing of blood samples as part of expansion of QC program. Discuss how new labs/groups could participate as part of this program - Henrik Zetterberg and Kaj Blennow **(15 min with discussion)**
- Roche has conducted experiments to study the key variables that determine the stability or decay of Ab40, Ab42 and tau in EDTA plasma. The data will be presented at CTAD, Roche to provide update to team following CTAD release - Malgorzata Rozga **(5-10 min)**
- Discuss SABB agenda for November 29th face-to-face meeting in Washington D.C. - Rebecca Edelmayer & All **(15 min discussion)**
