## **Do You Know Someone Who May Have Alzheimer's disease?**

The **Memory Disorders Research Center** of the Ohio State University Medical Center is 'Fitting the Pieces Together' to solve the problems of memory loss, dementia, and Alzheimer's disease.

Won't you join us in our fight to keep brains healthy?

Call us to see how we can help you: 614-293-6882

We are investigating the utility of several novel therapies not currently available by prescription, for people with memory conditions.

One of these exciting clinical trial opportunities: ICARA Study

Alzheimer's disease can strike anyone, but often its symptoms are dismissed as "just getting old", especially when there is no family history of the disease. That's why we need you to join the fight!

Doctors in your area are looking for volunteers to participate in a clinical study of an investigational drug that may help to control the progression of Alzheimer's disease. Throughout the study, participants may receive the investigational drug, study-related physical exams, and laboratory services at no charge. All participants will be monitored by a medical team including a nurse or study coordinator and a doctor.

If you (or a loved one) have a diagnosis of probable Alzheimer's disease and are between 50 and 88 years of age, you may be eligible to participate in the ICARA study.

For more information, call 614-293-6882.
