

Alzheimer's can't wait.

"The ripping away of your loved one is exacerbated by the cost of care, most often leaving those remaining with both grief and debt or bankruptcy."
– Larkspur, CO

5.4 million Americans have Alzheimer's disease today and that could go as high as **16 million** in just 38 years.

14.9 million Americans are caring for them and this is projected to soar to **45 million** in the same time period.

Today Alzheimer's costs Americans **\$183 billion** dollars and this will skyrocket to **\$1 trillion** each year in that same time frame.

Alzheimer's is the 6th leading cause of death in the U.S. No **other chronic disease** that affects so many has no known way to cure, prevent, or even slow its progress.

Alzheimer's is devastating to families from every walk of life. The economic cost is staggering. It's time to fulfill the potential of the National Alzheimer's Project Act, passed unanimously by Congress and signed by the President a year ago.

Families won't forget.
