

## Children's Books

Dear Amy Voss-

I really enjoyed your presentation on Altimers. My grandpa has a mild case of it and the book you gave me really helped my two sisters and little brother understand what's going on better. Thank you from my whole family.

Signed,

Kelsey Cox, Southeastern Student, Augusta

Alzheimer's changes the lives of everyone it touches, including children and teenagers, who might not understand what's happening to their loved one with the disease. In an effort to educate children and teenagers about brain health, Alzheimer's disease and its implications, program staff with the Central Illinois Chapter has been visiting junior and senior high schools within its 20 counties in the past year.

To continue this education effort, the Peoria office recently submitted and received a grant from Peoria North Rotary to purchase books for children and teenagers. These books are now available for loan at the Peoria library.
