Alzheimer's is a brain disease that causes problems with memory, thinking and behavior. Symptoms usually develop slowly and get worse over time, becoming severe enough to interfere with daily tasks. The disease robs people of their self and often depletes their caregivers both emotionally and financially. It is a progressive and fatal disease.

The Alzheimer's Association - Central Illinois Chapter is a donor supported, not-for-profit health organization serving 20 counties in central Illinois. The Association is working on four vital fronts:

- Providing care and support for all those impacted by dementia, including educational programs for caregivers.
- Advocating for federal, state and local policies that promote research, care and prevention.
- Funding research to solve the mysteries of Alzheimer's, accelerate the discovery of a cure, advance treatment for those living with the disease, and identify preventive measures.
- Increasing awareness to educate the public, raise concern about Alzheimer's as a national priority in order to generate greater support for research, patient care and public policy.

We need a world without Alzheimer's disease.  
**That's why we need you.**
