

memory university

Consecutive Thursdays, June 4, 11, 18 and 25
Registration at 1 p.m. program from 1:30 - 2:30 p.m.
Riley Outpatient Center, Auditorium
601 West Dr., Indianapolis

June 4

Understanding Aging and Memory Loss

Presented by Frederick W. Unverzagt, Ph.D.

This presentation will provide an overview of the genetics of both early onset and late onset AD. In particular, a contrast between early onset causative factors and late onset risk factors will be discussed.

June 18

Current Treatments and Promising Research

Presented by Ann M. Hake, M.D.

This presentation will outline the current treatments available to treat and manage AD and dementia. In addition, it will provide information about ongoing research efforts on promising new treatments for AD.

June 11

The Role of Neuroimaging Alzheimer's Disease Research

Presented by Andrew Saykin, Psy.D., ABCN

This presentation will review recent advances in brain scanning and image analysis for early detection and treatment monitoring in AD. The use of MRI and PET scans and future prospects for combining cognitive assessment, neuroimaging and genetics for determining risk for AD will be discussed.

June 25

Understanding the Genetics of Alzheimer's Disease

Presented by Tatiana Foroud, Ph.D.

This presentation will provide an overview of normal and abnormal cognitive aging and the factors and disorders that underlie these changes. In addition, the presentation will offer a review of the effectiveness of programs aimed at improving cognition and daily function in healthy older adults.

Registration is required for this series.

Contact the Alzheimer's Association's Helpline at 800.272.3900 or visit www.alz.org/indiana to register or get details.
