

facts about alzheimer's disease, elder care and the workplace

Alzheimer's disease is one of the primary reasons elder care is needed.

- 43.5 million adult caregivers are giving care to a person at least 50 years old.¹
- Top two reasons recipients need care:
 - Old age (12%)²
 - Alzheimer's disease (10%)²
- Nearly 15 million people provide unpaid care to a person with Alzheimer's or other dementias.⁵
 - This is 17 billion hours of unpaid caregiving valued at over \$202 billion dollars.⁵

*Nearly 15 Million People Provide Unpaid Care
for Alzheimer's or Other Dementias*

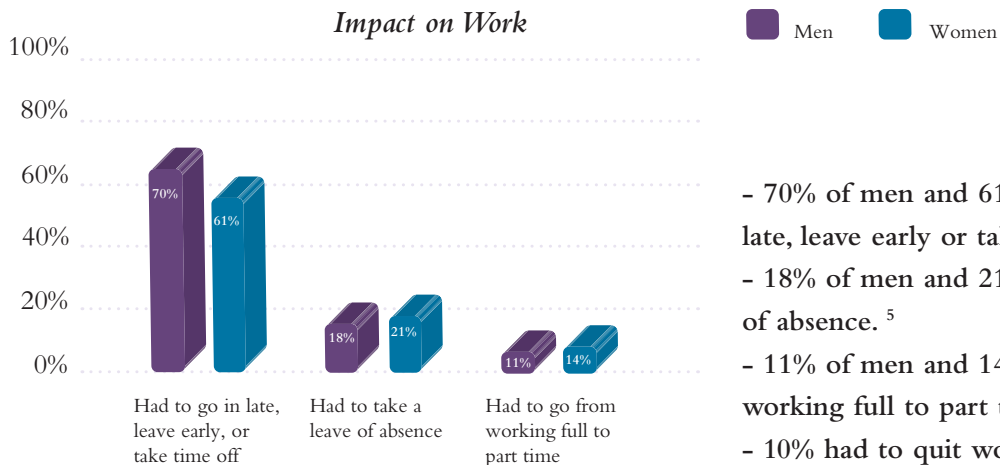

- 67% of the caregivers were between the ages of 35-64 years.⁵
- About 60% of the caregivers are women.⁵
- Nearly half were employed full or part time.⁵

- 86.1% of large companies surveyed offer some elder care services to their employees.⁴
 - 69.6% of companies offer EAP elder care counseling with less than 10% of the workforce utilizing the service (with a single digit average).⁴
 - 68% of working caregivers have to make accommodations for their loved one while working.¹

Alzheimer's disease impacts 6.6 million employees who provide elder care.⁵

- Many caregivers of people with Alzheimer's reported making major changes to their work schedules because of caregiving responsibilities.⁵

- 70% of men and 61% percent of women had to go in late, leave early or take time off.⁵
- 18% of men and 21% of women had to take a leave of absence.⁵
- 11% of men and 14% of women had to go from working full to part time.⁵
- 10% had to quit work.³

- Caregivers of persons with Alzheimer's or other dementias experience high levels of emotional stress and depression.⁵
- On average, caregivers for people with Alzheimer's disease have to care for the recipient longer than caregivers for other older adults.⁵
 - 32% of caregivers for persons with Alzheimer's or other dementia have been providing care for 5 years or more compared to 28% of caregivers of older adults.²

Alzheimer's disease is costly for businesses.

- Health care costs for persons with Alzheimer's or other dementias average three times higher than those of persons without these conditions.
- Alzheimer's disease and other dementias cost American businesses \$61 billion a year.³

Impact to Business

\$61 Billion Dollars per Year

- \$24.6 billion directly related to costs associated with Alzheimer's and other dementia care (e.g., health, long-term and hospice).³
- \$36.5 billion in costs to businesses, including lost productivity, related to employees providing care for individuals with Alzheimer's or other dementias.³
