

Research Study

Researchers at UC Irvine are trying to better understand how memory works in older adults with dementia. The study will focus on emotional memories and why some individuals can recall events better than others.

Study qualifications:

- are age 55+
- are English-speaking
- community-dwelling
- have a confirmed diagnosis of Alzheimer's disease or related dementia
- have an informant willing to participate in the study

What is involved:

The study will take place one time in your home for about 1.5 hours. The research consists of answering questions and completing memory activities. Those who participate will be compensated with \$30.
