activity-based alzheimer care: building a therapeutic program

Activities are an integral part of daily existence and give meaning to life--especially for persons with dementia. The Alzheimer's Association developed an activity-based program with some of the nation's leading activity experts in dementia care to support care settings and care-giving staff in building therapeutic programs. Learn how to examine assessment and care planning; identify design options and methods for implementation; how to adapt activities and environment to better meet needs, and much, much more. Lunch included. **Cost: \$69**
