MEDICAL COLLEGE OF WISCONSIN

Individuals with Depression and Memory Loss

The Medical College of Wisconsin is conducting a research study to increase our understanding of the differences in brain function between non-depressed and depressed individuals with memory loss, and persons with depression. Qualified participants must be at least 50 years old. Participants can have depression alone, mild memory loss or both. If you qualify, you will receive memory and behavioral testing, a MRI brain scan, and compensation for time and travel.
