

# cognitive decline in north carolina

#### DATA FROM THE 2011 BEHAVIORAL RISK FACTOR SURVEILLANCE SYSTEM

In North Carolina, 8.5 percent of those aged 60 and over report that they are experiencing confusion or memory loss that is happening more often or is getting worse.

Over 75 percent of them have <u>not</u> talked to a health care professional about it.

For those with worsening memory problems, more than four in ten say it has interfered with household activities and/or work or social activities. Percent with memory problems who have not talked to a health care provider

#### Percent of Those Aged 60+ Reporting Worsening Memory Problems in Previous 12 Months
