

Broaden interest in **developing using measures of care and outcomes in all research designs** and by care providers — including measures related to the Dementia Care Practice Recommendations (DCPR) — to improve care and outcomes for persons with dementia

Patient and Caregiver Reported Outcomes Core: Broaden expert **use of outcome measures for embedded pragmatic clinical trials (ePCTs)**

Critique existing **care measures** within each of the nine domains of the DCPR; facilitate their dissemination, adoption, implementation, and sustained use, including by creating an online repository of care measures.

- > Measures may include some not optimal for ePCTs

Promote the development of new outcome and care measures.

- > Calls for papers
- > Special issues
- > Grant opportunities

Provide publication opportunities on measurement in *Alzheimer's & Dementia*®: *The Journal of the Alzheimer's Association*.

Provide access to the Global Alzheimer's Association Interactive Network (GAAIN), a platform to share and access data.

**LINC-AD:** Critique existing **outcome measures** within each of the nine domains of the DCPR; facilitate their dissemination, adoption, implementation, and sustained use, including by creating an online repository of outcome measures.

**IMPACT:** Synthesize evidence and create a library of **outcome assessments (COAs)** relevant to conducting ePCTs among persons living with dementia (PLWD) and their caregivers/care partners. Organizing scheme is based on DCPR.

Define and disseminate best practices for collecting **Clinical Outcome Assessments (COAs)** from electronic health records, registries, and administrative databases.

- > Focus is on COAs that can be optimized for use in pragmatic trials

Provide guidance and consultation to investigators on measuring and applying COAs in the design and conduct of ePCTs among PLWD and their care partners.

### Initial areas of opportunity:

- > LINC-AD facilitate grant opportunities to promote measurement development for IMPACT investigators
- > LINC-AD facilitate IMPACT measurement-related publications in *Alzheimer's & Dementia*
- > IMPACT cores inform LINC-AD consensus process to guide measurement development
- > IMPACT and LINC-AD coordinate their repository/library
