Quick Tips for First Responders

WANDERING CALLS

Recognize Wandering
Look for these clues a person may need help:
- Blank or confused facial expression.
- Inappropriate attire.
- Unbalanced or shuffling gait.
- Person not aware of unsafe actions or situations.
- Age (Dementia is more likely with advanced age, but can also affect those under age 65).

Search & Rescue
Call 800.625.3780 to connect to MedicAlert + Alzheimer’s Association Safe Return, a 24-hour nationwide emergency response service for access to:
- Caregiver contact information.
- Critical medical information.
- Assistance with found persons who are not enrolled.

If a found person is not enrolled, share this valuable resource with caregivers and encourage them to enroll the person. Law Enforcement have a direct connection to MASR through RISS and LEO.

DRIVING CALLS

Help ensure a positive resolution to a driving incident.
- Issue a citation to create a paper trail.
- Do not let the person drive home.
- Follow local agency protocols for reporting the incident to the DMV.

ABUSE & NEGLECT CALLS

Situations of abuse and neglect can be complicated and require careful response.
- If the person is injured, transport to a hospital immediately.
- If the person is not injured but in immediate danger, move him or her to a safe location (preferably a hospital if in compliance with agency policy).
- If the person is not in immediate danger, offer referral to available resources.
- Always involve Adult Protective Services.

SHOPLIFTING CALLS

If a person with dementia unknowingly walks out of a store without paying:
- Attempt to resolve the issue with the store manager instead of arresting the person and filing criminal charges.
- Inform the person’s caregiver about the incident and recommend the person be accompanied on future shopping trips.

DISASTER RESPONSE

To move a person from danger and help keep him or her calm in evacuation situations:
- Avoid physical force or restraint.
- Be creative rather than rely on reality.
- Provide one-on-one instruction.
- Provide step-by-step instructions using simple language.
- Try to relocate the person to a quiet place.
- Use distraction by giving the person a simple task.
- Ensure the person is watched, at all times, to prevent wandering.
