<b>GPCOG Screening Test</b>								
Step 1: Patient Examination  Unless specified, each question should only be asked once								
<u>Nar</u>	ne and Address for subsequent recall test							
1. "I am going to give you a name and address. After I have said it, I want you to repeat it. Remember this name and address because I am going to ask you to tell it to me again in a few minutes: John Brown, 42 West Street, Kensington." (Allow a maximum of 4 attempts).								
Tim	e Orientation	Correct	Incorrect					
2.	What is the date? (exact only)							
Clo	Clock Drawing – use blank page							
3.	Please mark in all the numbers to indicate the hours of a clock (correct spacing required)							
4.	Please mark in hands to show 10 minutes past eleven o'clock (11.10)							
<u>Information</u>								
5.	Can you tell me something that happened in the news recently (Recently = in the last week. If a general answer is given, eg "war", "lot of rain", ask for details. Only specific answer sco							
Rec	eall							
6.	— What was the name and address I asked you to remember							
	John							
	Brown							
	42							
	West (St)							

If patient scores 9, no significant cognitive impairment and further testing not necessary.

If patient scores 5-8, more information required. Proceed with Step 2, informant section.

If patient scores 0-4, cognitive impairment is indicated. Conduct standard investigations.

/9

(To get a total score, add the number of items answered correctly

Kensington

**Total correct** (score out of 9)

## **Informant Interview**

		Date:						
Informant's name:								
Informant's relationship to patient, i.e. informant is the patient's:								
					1			
	These six questions ask how the patient is compa was well, say 5 – 10 years ago	red to v	when	s/he				
	Compared to a few years ago:							
		Yes	No	Don't Know	N/A			
•	Does the patient have more trouble remembering things that have happened recently than s/he used to?							
•	Does he or she have more trouble recalling conversations a few days later?							
•	When speaking, does the patient have more difficulty in finding the right word or tend to use the wrong words more often?							
•	Is the patient less able to manage money and financial affairs (e.g. paying bills, budgeting)?							
•	Is the patient less able to manage his or her medication independently?							
•	Does the patient need more assistance with transport (either private or public)? (If the patient has difficulties due only to physical problems, e.g bad leg	, tick 'no')						
(To get a total score, add the number of items answered 'no', 'don't know' or 'N/A')  Total score (out of 6)								

If patient scores 0-3, cognitive impairment is indicated. Conduct standard investigations.
