

Therapeutic Agents in Phase II Clinical Trials for Alzheimer's Disease (1 of 3)

<p>ABBV-8E12: anti-tau antibody AbbVie</p> <p>ABvac40: Amyloid Immunotherapy Araclon Biotech</p> <p>AD-35: Acetylcholinesterase inhibitor Zhejiang Hisun Pharma</p> <p>AMX0035: Blocks mitochondrial and endoplasmic reticulum stress Amylyx Pharmaceuticals</p> <p>ANAVEX2-73: Muscarinic agonist and sigma receptor agonist Anavex Life Sciences</p> <p>APH-1105: Alpha secretase modulator Aphios</p> <p>AR1001: Non-selective dopamine agonist AriBio Co</p> <p>Autologous adipose-derived mesenchymal stem cells: Surgically administered to differentiate into nerve cells Hope Biosciences</p> <p>Azeliragon: RAGE inhibitor vTv Therapeutics</p>	<p>BAN2401: humanized IgG1 version of the mouse mAb158 Eisai</p> <p>Benfotiamine supplement Burke Research Institute</p> <p>BIIB092: anti-eTau biologic Biogen</p> <p>Boost A nutritional supplement National Institute on Aging</p> <p>BPN14770: Allosteric inhibitor of phosphodiesterase 4D Tetra Discovery Partners</p> <p>CAD106: immunotherapy to beta-amyloid Novartis Pharmaceuticals</p> <p>Candesartan: Angiotensin receptor blocker Emory University</p> <p>CB-AC-02 stem cells: surgically administered to differentiate into nerve cells CHABiotech Co., Ltd</p> <p>Cilostazol: phosphodiesterase inhibitor with therapeutic focus on cyclic adenosine monophosphate National Cerebral and Cardiovascular Center</p>	<p>COR388: Peptide hydrolase inhibitor; inactivates gingipains released by <i>P. gingivalis</i> Cortexyme</p> <p>CNP520: BACE inhibitor Novartis Pharmaceuticals</p> <p>Crenezumab: Amyloid antibody Genentech</p> <p>CT1812: displaces bound Aβ oligomers Cognition Therapeutics</p> <p>Curcumin supplement VA Office of Research</p> <p>DAOI: NMDA receptor enhancer Chang Gung Memorial Hospital</p> <p>Dapagliflozin: Sodium-glucose cotransporter 2 inhibitor University of Kansas</p> <p>Daratumumab: human antibody that targets CD38 Janssen</p>	<p>Dasatinib + Quercetin: tyrosine-kinase inhibitor + nutritional supplement University of Texas Health Science Center at San Antonio</p> <p>Deferiprone: Iron chelator Neuroscience Trials Australia</p> <p>Docosahexaenoic acid supplement University of Southern California</p> <p>Elderberry juice supplement University of Missouri</p> <p>Gantenerumab: beta-amyloid antibody Washington University</p> <p>GB301: Autologous regulatory T cells GMP BIO Co</p>
--	---	---	--

Therapeutic Agents in Phase II Clinical Trials for Alzheimer's Disease (2 of 3)

Ginkgo biloba, with and without donepezil

The First Affiliated Hospital with Nanjing Medical University

Grape powder supplement
UCLA

Grape-seed extract supplement
National Center for Complementary and Integrative Health

GRF6019: Plasma therapy
Alkahest

Gulingji capsules: Chinese medicine compound

Xiyuan Hospital of China

GV1001: Telomerase peptide
GemVax & Kael

Human Mesenchymal Stem Cells: surgically administered to differentiate into nerve cells

Stemedica Cell Technologies

Icosapent ethyl / Omega-3 fatty acid: nutritional supplement

USC, VA Office of Research, OHSU, University Hospital Akershus

Immunoglobulin: Treats primary immunodeficiency

Sutter Health

Insulin glulisine: Insulin analog
HealthPartners Institute

Insulin, intranasal: pancreatic anabolic peptide hormone

Wake Forest University Health Sciences

IONIS MAPTRx: Targets tau protein
Ionis Pharmaceuticals

L-serine: Amino acid used in the biosynthesis of proteins

Dartmouth-Hitchcock Medical Center

Lemborexant: Antagonist of orexin OX1 and OX2 receptors

Eisai

Lenalidomide: derivative of thalidomide

The Cleveland Clinic

Levetiracetam: Synaptic vesicle protein modulator, decreases beta-amyloid production

University of Minnesota and others

Liraglutide: agonist to receptors of glucagon-like peptide 1 (GLP-1)

Imperial College London

Lithium: GSK3 Inhibitor
New York State Psychiatric Institute

LM11A-31-BHS: p75 neutrophin receptor ligand

Pharmatrophix

Losartan, amlodipine & atorvastatin combination therapy: angiotensin II receptor blocker, calcium channel blocker, and hydroxymethylglutaryl-coenzyme, a reductase inhibitor

University of Texas Southwestern

Lupron (plus acetylcholinesterase inhibitor): synthetic gonadotropin-releasing hormone and acetylcholinesterase inhibitor

NYU Langone Health

LY3002813: Monoclonal antibody
Eli Lilly and Company

LY3303560: Tau MAB

Eli Lilly and Company

Metabolic Cofactor Supplement
Istanbul Medipol University Hospital

Metformin: Lowers blood glucose levels

Johns Hopkins University

MMFS-205-SR supplement
Neurocentria

Montelukast: Leukotriene receptor antagonist

IntelGenx

NA-831: neuroprotective and neurogenesis agent

NeuroActiva

Neflamapimod: Inhibitor of the enzyme p38 mitogen-activated protein kinase alpha (p38α)

EIP Pharma, University Hospital, Toulouse

NeuroStem (stem cells): Surgically administered to differentiate into nerve cells

Medipost

Therapeutic Agents in Phase II Clinical Trials for Alzheimer's Disease (3 of 3)

Niagen® supplement University of Delaware	PQ912: inhibitor of glutaminy cyclase (QC) Probiobdrug AG	T3D-959:dual PPAR-δ/PPAR γ nuclear receptor agonist T3D Therapeutics, Inc	For related symptoms: Brexipiprazole (agitation): Dopamine D2 receptor partial agonist Otsuka Pharmaceutical
Nicorandil: anti-angina medication University of Kentucky	Prazosin: alpha-1 adrenoreceptor antagonist ADCS	T-817MA: neurotrophic agent FUJIFILM Toyama Chemical Co., Ltd.	Cannabis oil (agitation): Cannabinoid TO Pharmaceuticals
Nicotinamide supplement University of California-Irvine	Rifaximin: oral antibiotic Duke University	Tacrolimus: immunosuppressant Massachusetts General Hospital	Dexmedetomidine (agitation): inhibition of norepinephrine BioXcel Therapeutics Inc
Nicotine: nicotinic acetylcholine receptor (nAChR) agonist USC	Riluzole: glutamate modulator Icahn School of Medicine at Mount Sinai	Thiethylperazine: Antiemetic - antipsychotic Immugenetics AG	Nabilone/Dronabinol (agitation): The principal psychoactive constituent of cannabis Johns Hopkins University
Nilotinib: BCR-ABL kinase inhibitor Georgetown University	RO7105705: anti-tau antibody Genentech	Trigriluzole: Pro-drug of riluzole, a glutamate modulator agent Biohaven Pharmaceuticals	
ORY-2001: SD1 and MAO-B inhibitor Oryzon Genomics S.A.	RPh201: botanical extract Regenera Pharma	Valacyclovir: Antiviral Umea University; New York State Psychiatric Institute	
Perindopril: ACE inhibitor Sunnybrook Health Sciences	Sargramostim: Stimulates the immune system, reduces inflammation, activates microglia University of Colorado	VGH-AD1: Traditional Chinese Herbal Medicine Taipei Veterans General Hospital, Taiwan	
PMZ-1620: selective endothelin-B receptor agonist Pharmazz, Inc.	S-Equol: estrogen receptor β (ERβ) agonist Ausio Pharmaceuticals	Vitamin D3 supplement University of California, Davis	
Polyamine supplement Charite University, Berlin	Souvenaid nutritional supplement University of Miami		
Posiphen®: reduces amyloid precursor protein QR Pharma
