Alzheimer’s disease touches MILLIONS of lives.

ALZHEIMER’S DISEASE IS THE 6TH leading cause of death in the United States
EARLY AND ACCURATE DIAGNOSIS COULD SAVE UP TO $7.9 TRILLION in medical and care costs
EVERY 65 SECONDS someone in the United States develops the disease

5.7 MILLION
Americans are living with Alzheimer’s
BY 2050, this number is projected to rise to nearly 14 MILLION

IN 2018, Alzheimer’s and other dementias will cost the nation $277 BILLION
BY 2050, these costs could rise as high as $1.1 TRILLION

16.1 MILLION AMERICANS provide unpaid care for people with Alzheimer’s or other dementias
These caregivers provided an estimated 18.4 BILLION HOURS of care valued at over $232 BILLION

1 IN 3 seniors dies with Alzheimer’s or another dementia
It kills more than breast cancer and prostate cancer COMBINED
The Effect of Alzheimer's and Dementia Caregiving on the Workplace

- Alzheimer's disease is a global epidemic that affects many Americans. More than 15 million are serving as caregivers for the over 5 million people living with Alzheimer's and other dementias. And for the majority of caregivers, the reach of this disease extends beyond their personal lives — 75 percent reported that they were employed while fulfilling care responsibilities.

- The number of Americans with Alzheimer's disease and other dementias will escalate rapidly in coming years as the baby boomer generation ages. By 2050, the number of people age 65 and older with Alzheimer's disease may nearly triple from 5 million to as many as 16 million, barring the development of medical breakthroughs to prevent, slow or stop the disease.

- Based on these numbers, it's likely that you have, or will have, employees who are balancing the demands of work and caregiving. And given the prevalence and trajectory of Alzheimer's — the sixth-leading cause of death in the United States — everyone can benefit from learning more about the disease, its warning signs and the importance of early detection.

Why Should My Company Participate?

- Alzheimer’s costs American businesses $61 billion a year in health care expenses and lost productivity due to caregiver absenteeism.
- According to the Society for Human Resource Management, nearly 6 out of 10 individuals caring for an aging loved one work full-time.
- 78 percent of consumers are more likely to buy a product or patronize a business that is associated with a favored cause.

The Effect of Alzheimer's and Dementia Caregiving on the Workplace

- 54% had to go in late/leave early/take time off
- 15% had to take a leave of absence
- 15% had to give up working entirely
- 13% had to go from working full-to part-time
- 13% had to take a less demanding job

A Holistic Partnership Strategy

The Alzheimer's Association offers our corporate partners a variety of ways to engage in a meaningful, multifaceted collaboration.

Opportunities to educate and empower employees include but are not limited to:

- Starting a team for Walk to End Alzheimer’s® or The Longest Day®.
- Committing to sponsor one of the events highlighted in this packet or becoming a Purple Patrons sponsor (see page 9).
- Including the Alzheimer’s Association in your workplace giving campaign.
The Walk to End Alzheimer’s® provides an opportunity for the community — family and professional caregivers, those diagnosed with Alzheimer’s, people who have lost a loved one to Alzheimer’s and those who know Alzheimer’s could impact them at any time during their lives — to come together with one voice and say that now is the time to fight back.
