

Alzheimer's Association® Support Groups

Support groups create a safe, confidential, supportive environment or community and a chance for participants to develop informal mutual support and social relationships. They also educate and inform participants about dementia and help participants develop methods and skills to solve problems.

Alzheimer's Association Caregiver Support Groups

Alzheimer's Association caregiver support groups are conducted by trained facilitators and are a safe place for caregivers, family and friends of persons with dementia. These groups help caregivers develop a support system, allow members to exchange practical information on caregiving challenges and possible solutions, and talk through issues and ways of coping, as well as share feelings, needs and concerns. They are also a place to learn about outside community resources.

See attached pages for a complete listing of our caregiver support group in Polk, Benton, Marion and Linn counties.
