ALZHEIMER’S DISEASE & RELATED DEMENTIAS IN CALHOUN COUNTY, SC

According to the South Carolina Alzheimer’s Disease Registry:

- 227 individuals in Calhoun County were living with Alzheimer’s Disease or Related Dementias (ADRD).
- Statewide, 111,818 South Carolinians were living with ADRD.
- Calhoun County has seen a 50% increase in documented cases since 2000.*

*This fact sheet reflects data from 2017, the most current year that complete data is available.

Cases by Race
African Americans were 105% more likely to have ADRD than their non-Hispanic white counterparts within the county.

Cases by Age
While most individuals with ADRD were 65 or older, 12% of county cases were under the age of 65.

Place of Residence
At time of diagnosis, most individuals lived in a community setting† rather than a skilled nursing facility.
