According to the South Carolina Alzheimer’s Disease Registry:

- 1,486 individuals in Darlington County were living with Alzheimer’s Disease or Related Dementias (ADRD).
- Statewide, 111,818 South Carolinians were living with ADRD.
- Darlington County has seen a 130% increase in documented cases since 2000. *

*C This fact sheet reflects data from 2017, the most current year that complete data is available.

### CASES BY RACE
African Americans were 27% more likely to have ADRD than their non-Hispanic white counterparts within the county.

### CASES BY AGE
While most individuals with ADRD were 65 or older, 11% of county cases were under the age of 65.

### PLACE OF RESIDENCE
At time of diagnosis, most individuals lived in a community setting§ rather than a skilled nursing facility.
