healthy living for your brain and body: tips from the latest research

For centuries, we have known that the health of the body and brain are connected. But now, science is able to provide insights into how to make lifestyle choices that may help you keep your body and brain healthy as you age. Join us to learn about research in the areas of diet and nutrition, exercise, cognitive activity and social engagement, and use hands-on tools to help you incorporate these plans into a plan for healthy aging.

Cost: FREE.

know the 10 signs Early detection matters. The warning signs of Alzheimer's disease are often dismissed as side effects of normal aging. If you or someone you know is experiencing memory loss or behavioral changes, it is time to learn the facts. Early detection gives you the chance to begin drug therapy, enroll in clinical studies and plan for the future. Attend this interactive workshop to learn of the 10 warning signs of Alzheimer's disease. We will separate myth from reality and address commonly-held fears about Alzheimer's in America. Hear from people who have the disease and find out how to recognize the signs in yourself and others.

Cost: FREE.

dementia conversations: driving, doctor visits, legal & financial

The fear or lack of awareness that often accompanies having these types of conversations can result in delays that have serious consequences for the entire family. This program offers concrete suggestions for successful discussions and for creating well-functioning care teams. Participants will leave with a list of talking points and suggestions to help them have the challenging conversations.
