Wisconsin ADRC By the Numbers

The Wisconsin Alzheimer’s Disease Research Center (ADRC) studies the causes, diagnosis, treatment, and prevention of Alzheimer’s disease. It also trains young scientists and provides public brain health education. The following is a summary of our accomplishments since the center was formally established in April 2009 through March 31, 2022.

- 41 Scientists
  - 24% from underrepresented groups
- 66 Active Research Studies in Basic Science and Clinical Research
- 350 Community outreach and educational events in 2021
- 90 Research papers published last year
- 120 Podcast episodes of Dementia Matters
  - 258,598 episode downloads
- 26% international listenership from 110 countries
- 85 Junior Scientists trained in our center in 2021
- Clinical Core participants
  - 1049
  - 24% from underrepresented groups
  - 842 participated in Magnetic Resonance Imaging (MRI)
  - 585 participated in Lumbar Punctures (LPs)
  - 268 participated in Positron Emission Tomography (PET)
- 66% have agreed to be brain donors
