GOALS
For the 2024-2028 State Dementia Plan

Goal Topics:
- Public Education/Awareness
- Professional Development/Workforce
- Coordinated Care
- Data/Research
- Policy/Advocacy

SMALL GROUP QUESTIONS
1. What do you see as your role in implementing this goal?
2. How do you see this goal aligning with existing strategies/initiatives?
3. Do you have proposed changes to this goal?
TOPIC 1: PUBLIC EDUCATION/LOCAL SUPPORT

Educate the public about brain health, risk reduction, dementia-friendly strategies, health disparities, and caregiver support.

Support people living with dementia, caregivers, and family members through culturally appropriate educational programs, resources, support services, and partnerships.
TOPIC 2:
PROFESSIONAL DEVELOPMENT/WORKFORCE

Grow a dementia-capable and culturally humble professional workforce to care for older adults and people living with dementia throughout the continuum of care.

Promote consistent, high-quality, and appropriate care by supporting standardized dementia training (for the medical, public health, crisis care, community-based care, facility-based care, and social services fields).
Support public safety, legal, and financial organizations through culturally responsive initiatives to assure the safety of people living with dementia who are at risk of abuse, neglect, and/or exploitation.

TOPIC 3: COORDINATED CARE

Coordinate access to care and improve communication between professionals who care for people living with dementia. Coordinated care includes healthcare and long-term care facilities, crisis care organizations, and community-based service providers.
Encourage partnerships to develop and expand dementia support services that reach clients from various cultural identities across the lifespan.

Develop a coordinated system of dementia-related crisis response that promotes stabilization in place efforts when safe and appropriate. This multi-disciplinary approach should be inclusive of informal supports and include clearly defined roles and responsibilities.
Support researchers and organizations through data sharing and networking opportunities.

Champion and strengthen research and data collection aimed at preventing and treating Alzheimer's Disease and related dementias, including participation from people representing a variety of cultural identities.

Facilitate access to research findings to inform programs and improve health outcomes, such as by collaborating with public health agencies to encourage equitable risk-reduction strategies and address social determinants of health.
Evaluate the State Dementia Plan's goals to measure whether the plan has efficiently, effectively, and equitably improved dementia care.

TOPIC 5: POLICY/ADVOCACY

Include and seek input from people living with dementia and their caregivers in the development of policies and programs that effectively and equitably address individual and community needs.
Coordinate and inform state budgetary, legislative, and regulatory actions that impact all people living with dementia and caregivers.

Promote local-level policies and programs that support dementia inclusion and friendliness.

Support the development of policies and programs that address health disparities and social determinants of health that increase risk factors for dementia.

CONVERSATION METHODS

Community Conversations

- Derived – Leadership Team
- Question Sets – 4
  - Community | Healthcare | Partner
- Local facilitator and notetaker
- Intentional equity and inclusions

Individuals – 900+
Conversations – 48

CONVERSATION DATA

- Abstracting comments → categorizing into State Dementia Plan goals, subgoals
- Public Education/Local Support
- Professional Development/Workforce
- Coordinated Care
- Data/Research
- Policy/Advocacy

- Comprehensiveness, general trends, specific highlights
- "I cover 4 counties and we have 1 Adult Day Program and zero Memory Cafes."
- "Staff feel they lost so many residents so quickly which caused staff trauma. They miss the residents that died."

TAKE AWAYS

- Integrating data into State Dementia Plan
- Survey
  - Supporting caregivers: prominent theme
  - Spotlight to racially/ethnically diverse communities, relationship with dementia
- Abstracting
  - To confirm State Dementia Plan goals align with community | partner | healthcare experiences
  - Integrate voices into the State Dementia Plan
- More to come!
