Advancing the Science: The Latest in Alzheimer's and Dementia Research
Offered in partnership with Successful Aging in Greendale for Everyone (SAGE)
Alzheimer's is a global health problem with more than 6 million people living with the disease in the US alone. Tremendous gains have been made in the understanding of the science and basic biology underlying Alzheimer's and other dementias. These advances are leading to great strides in strategies for prevention, detection, diagnostics, and therapeutic interventions. The Alzheimer's Association is a global leader in research, mobilizing the field to advance the vision of a world without Alzheimer's and all other dementias. Learning objectives include: Landscape of Alzheimer's and dementia science, basic facts and figures regarding Alzheimer's and other dementias, risk factors; highlights in early detection and diagnosis and why early detection and diagnosis are important; define biomarkers, why they are needed, and some of the ways biomarkers are used in dementia research; latest advances in clinical trials, treatments and lifestyle interventions; discover the diversity in therapeutic approaches currently under investigation; and advances in clinical trials, treatments and/or lifestyle interventions.

Dementia Conversations: Driving, Doctor Visits, Legal & Financial Planning
When someone is showing signs of dementia, it's time to talk. Often, conversations with family about changing behaviors can be challenging and uncomfortable. This program provides tips for breaking the ice with your family so you can address some of the most common issues that are difficult to discuss: going to the doctor for a diagnosis or medical treatment, deciding when to stop driving, and making legal and financial plans for future care.

Effective Communication Strategies
Communication is more than just talking and listening – it's also about sending and receiving messages through attitude, tone of voice, facial expressions and body language. As people with Alzheimer's disease and other dementias progress in their journey and the ability to use words is lost, families need new ways to connect. Join us to explore how communication takes place when someone has Alzheimer's, learn to decode the verbal and behavioral messages delivered by someone with dementia, and identify strategies to help you connect and communicate at each stage of the disease.
