

OPPORTUNITY FOR PERSONS WITH MILD COGNITIVE IMPAIRMENT (MCI)/ DEMENTIA/ALZHEIMER'S AND THEIR FAMILY CAREGIVERS TO PARTICIPATE IN A STUDY CONDUCTED BY UWM SCIENTISTS

WHO IS CONDUCTING THIS STUDY?

This study is being conducted by researchers at the University of Wisconsin-Milwaukee. The Principal Investigator of this study is Dr. Priya Nambisan - Call : (414)-251-5217 or Email:nambisap@uwm.edu for any questions regarding this study.

OBJECTIVE

The objective of this study is to evaluate the effectiveness of a Comprehensive Digital Self-care system (CDSSS) named myHESTIA for Persons with Dementia or Alzheimer's and their family caregivers.

ELIGIBILITY

Caregivers must be a family caregiver of a person with Mild Cognitive Impairment(MCI)/Dementia/Alzheimer's and should have power of attorney in the care of this person. Patients in early stage dementia/Alzheimer's preferred, but please contact us to determine eligibility.

EXPECTATIONS

Participants will need to use myHESTIA platform for 4 weeks and also participate in an interview regarding how they used the platform and their evaluation of the myHESTIA platform

BENEFITS: Caregivers and Persons with MCI/Dementia/Alzheimer's could use the myHESTIA platform to keep notes, journals and track health issues/symptoms, concerns, changes in behavior and also use the system to better communicate with each other.

Participate to earn \$100 Gift card/participant
